Introduction

I'm a Software Engineer with hands-on experience in building cloud-native applications and automation solutions. Skilled in designing scalable infrastructure, streamlining CI/CD pipelines, and integrating security best practices across the development lifecycle. I also have strong experience developing applications in Python, enabling me to bridge software engineering with platform reliability. Adept at collaborating with cross-functional teams, mentoring developers, and delivering secure, high-performing systems.

Education

Soch College Of IT (Tribhuvan University)

2019 - 2024

Bachelor of Science in Computer Science and Information Technology

Pokhara, Gandaki

Technical Expertise

Cloud & Infrastructure: AWS (EKS, EC2, Lambda, CloudWatch), Terraform, Kubernetes, Docker

DevOps & Automation: GitHub Actions, Jenkins, CI/CD, Nginx, Infrastructure as Code

Development: Python, Django, Go, JavaScript, REST APIs, Microservices Architecture

Monitoring & Security: ELK Stack, Grafana, Prometheus, CloudTrail, Vulnerability Assessment

Professional Experience

Leapfrog Technology Inc

May 2025 - Aug 2025

DevOps and SecOps Fellow

Kathmandu, Nepal

- Designed secure AWS infrastructure with automated compliance monitoring and vulnerability remediation workflows.
- Built CI/CD pipelines with integrated security scanning (Semgrep, SonarQube) for ECS deployments.
- Managed production workloads across on-premise Kubernetes (kubeadm) clusters and AWS ECS, ensuring high availability for thousands of daily users.

The Legalitis

Jan 2025 – May 2025

Software Engineer

Remote

- Developed scalable Django REST APIs for a legal document processing platform, collaborating with frontend teams to deliver seamless experiences.
- Implemented microservices and Docker-based deployment strategy, enabling system scalability and faster releases.

Asarfi

Jun 2024 – Feb 2025

DevOps Engineer

Pokhara, Gandaki

- Orchestrated microservices deployment on AWS EKS with automated scaling and secure networking.
- Implemented Infrastructure as Code using Terraform, cutting provisioning time from hours to minutes.
- Deployed centralized monitoring with ELK and Grafana for system reliability.
- Mentored development teams on DevOps practices and cloud-native architectures within Agile workflows.

College Projects

AI-Powered Stock Prediction Platform | Python, TensorFlow, Django, AWS

2024

- Developed LSTM-based stock prediction system with real-time data processing

Cloud-Native E-commerce Solution | Django, React, Docker, AWS

2023

- Built full-stack e-commerce platform with microservices design, secure payment processing, and dynamic inventory management.

Leadership

Executive Member, CSITAN Pokhara

2021 – 2022

- Served as an executive member, contributing to planning and execution of technical events and workshops.
- Collaborated with student leaders and industry professionals to foster a culture of innovation and learning.
- Strengthened the community's engagement by leading outreach initiatives and organizing flagship programs.

Mentorship and teaching Experience

Technical Mentor

2021 – 2025

Python, Web Development, DevOps, Cloud

- Mentored students in Python programming and web development, Including frameworks like Django and Flask
- Conducted DevOps and cloud computing workshops, breaking down complex technical concepts for diverse audiences.

High school Mathematics Teacher

2019 – 2023

Diamond Model School

Pokhara, Nepal

- Taught core mathematics subjects including Algebra, Geometry, Trigonometry, and Calculus to secondary-level students.
- Designed lesson plans and problem-solving exercises to build analytical and logical thinking skills.
- Introduced real-world applications of mathematics in programming and computing to inspire students towards STEM fields.
- Provided personalized guidance and mentorship, helping students improve exam performance and confidence in quantitative subjects.
