Kathmandu, Nepal

EDUCATION

BSc. Computer Science & IT

Soch College of IT

Tribhuvan University

Pokhara, Nepal • 2019–2024

TECHNICAL SKILLS

Cloud & Infrastructure

AWS (EKS, ECS, EC2, Lambda, CloudWatch), Terraform, Kubernetes, Docker

DevOps & Automation

GitHub Actions, Jenkins, CI/CD, Nginx, Infrastructure as Code

Development

Python, Django, Go, JavaScript, REST APIs, Microservices

Observability & Security

ELK Stack, Grafana, Prometheus, CloudTrail, Semgrep, SonarQube

AI & Automation

GenAI Solutions, Agentic AI Systems, n8n, LLM Integration

LEADERSHIP

Executive Member

CSITAN Pokhara • 2021–2022

Organized technical workshops and community outreach initiatives for the regional CS/IT student network.

Profile

Software Engineer specializing in cloud-native systems, DevOps automation, and AI-driven workflows. Proven record of designing scalable AWS infrastructure, hardening CI/CD pipelines with integrated security, and delivering production systems serving thousands of daily users. Combines strong Python engineering with platform reliability and clear cross-functional communication.

Professional Experience

CopilotHQ

May 2026 – Present

AIOps Software Engineer | Brisbane, Australia (Remote)

- Architect and deploy GenAI solutions and agentic AI systems that automate client business operations end-to-end.
- Design AI-powered document-processing and order-automation workflows, partnering directly with clients from requirements through production deployment.

Leapfrog Technology Inc.

May 2025 – Aug 2025

DevOps & SecOps Fellow | Kathmandu, Nepal

- Engineered secure AWS infrastructure with automated compliance monitoring and vulnerability-remediation workflows.
- Built CI/CD pipelines with integrated security scanning (Semgrep, SonarQube) for containerized ECS deployments.
- Operated production workloads across on-premise Kubernetes clusters and AWS ECS, maintaining high availability for thousands of daily users.

The Legalitis

Jan 2025 – May 2025

Software Engineer | Remote

- Developed scalable Django REST APIs for a legal document-processing platform in close collaboration with frontend teams.
- Introduced a microservices architecture with Docker-based deployments, improving scalability and release velocity.

Asarfi

Jun 2024 – Feb 2025

DevOps Engineer | Pokhara, Nepal

- Orchestrated microservices on AWS EKS with automated scaling and secure networking.
- Implemented Infrastructure as Code with Terraform, cutting environment provisioning time from hours to minutes.
- Deployed centralized observability (ELK, Grafana) and mentored developers on DevOps and cloud-native practices.

Projects

AI-Powered Stock Prediction Platform — Python, TensorFlow, Django, AWS

2024

- Built an LSTM-based prediction system with real-time market data ingestion and processing.

Cloud-Native E-commerce Solution — Django, React, Docker, AWS

2023

- Delivered a full-stack platform with microservices design, secure payment processing, and dynamic inventory management.

Teaching & Mentorship

Technical Mentor

2021 – 2025

Python, Web Development, DevOps & Cloud

- Mentored students in Python, Django, and Flask; led DevOps and cloud-computing workshops for diverse technical audiences.

Mathematics Teacher

2019 – 2023

Diamond Model School | Pokhara, Nepal

- Taught secondary-level Algebra, Geometry, Trigonometry, and Calculus, connecting mathematics to programming to encourage STEM pathways and measurably improving exam performance.
